DESCRIPTION

8. NOTABLE FEATURES In a plain provincal style that combines a symmetrical outline and hipped roof (probably dimly inspired by the Georgian Revival) with lingering Queen Anne patterns on the walls, this small-town schoolhouse is hard to characterize. Originally it had a gabled porch at the front door and railings down both sides of the steps. 9. ARCHITECTURAL-HISTORICAL An old photograph shows trim and stickwork painted lighter than the walls, articulating the mass and giving it more lightness and vivacity. The present monotone turns the building into a single big looming hulk. The school, which had

closed somewhat earlier, was reopened briefly in the 1940s to carry the postwar overload until the Calvin Leete School was built in 1951. From c1954 to c1946 it was occupied by the Guilford Shirt Company, and in 1963 it became the office of Victor Lundy, architect.
