6. DATE 1898

BUILDER STYLE Shingle Style

7. ALTERATIONS

Major alterations have changed the form of the building -- see below.

8. NOTABLE FEATURES

Superbly sited on bare rock; shingles weathered a sea-grey with plain white trim in the classic seaside tradition; high narrow bridge leap-frogging from rock to rock.

9. ARCHITECTURAL-HISTORICAL

It began as one of the characteristically pure and romantic buildings of the great period of seaside architecture in the '80s and '90s-built on a rock out in the water, surrounded by waves and reached only by a footbridge. A deep shadowy verandah ran all around under a long sloping roof that floated above it and gave the grey shingled mass a profile that seemed part of the coastline. A large threestory addition was made in 1901, unbalancing the serene composition, destroying the romantic image of the seascape. In the 1938 hurricane this was partly demolished, and the building was rebuilt in its present form. Architect's drawings for the 1901 addition are in the possession of H. Milton Bullard, Sachem's Head. No architect is named, but the initials "R.W.B." appear.
