HISTORIC RESOURCE INVENTORY – BUILDINGS AND STRUCTURES

CONTINUATION SHEET

58 High Street

Interrelationship of building and surroundings

Directly to the west of the property is 66 High Street, which was once a factory and is in the process of being converted into condominiums. Less than a mile to the north is the Guilford Green. Surrounding the property are nineteenth and early twentieth century single-family dwellings.

Other notable features of building or site

A porch protrudes off the east elevation of the house. A secondary entry, it is assumed, is located through this porch. The porch is reached by concrete steps and has a hip-roof supported by square columns. Fenestration includes six-over-six double-hung windows. A small rectangular window is located just under the eaves of the roof on the east elevation. Italianate features include the wide overhanging eaves, the rectangular window under the eaves, and the wide fascia board.

Historical or Architectural importance

As noted by Joel Helander in *A Treasury of Guilford Places*, "High Street, off Whitfield Street, was laid out as an access road to Junius S. Norton's brass foundry in 1850" (Helander 2008, 78).
