HISTORIC RESOURCE INVENTORY – BUILDINGS AND STRUCTURES

CONTINUATION SHEET

179 Old Quarry Road

Notable Features Continued

A staircase leads from the ground up into the house on the east side of the house. There are large windows covering a large portion of the house. Having been changed over the years, the house was taken apart and rebuilt in 2006 to the original Tony Smith plans, along with the an addition.

Historical Significance Continued

As a child, Smith had tuberculosis and recalled building small models with his medication boxes while on bed rest. After an unsuccessful time in an architectural design program in Chicago, Smith took a job with Frank Lloyd Wright, starting as a bricklayer and carpenter. Quickly rising to site supervisor, Smith decided to start his own architecture firm in New York City that he maintained until the 1960s. He designed more than twenty private residences, never having earned an official architect certification. He also taught for notable art and architecture schools during his career. In 1961, Smith moved on from architecture and focused on sculpting. His first exhibition in 1964 was held at the Wadsworth Athenaeum in Hartford, CT.
