## HISTORIC RESOURCE INVENTORY – BUILDINGS AND STRUCTURES

### **CONTINUATION SHEET**

**139 Prospect Avenue** 

### **Buildings and Surroundings**

An inlet of water cuts into the peninsula as well so this house has water bordering the north side of the property, and more land just beyond that at the end of Colonial Road. This north side of the property also has an apartment building and garage with a long driveway leading to it that is east of the main building. A small driveway is located at the southeastern corner of the house and property. The two buildings are separated by a line of trees.

### **Notable Features**

The same fenestration is on the first floor level. The first floor door entry has a white door surround with sidelights. The most prominent feature of the façade is the two story porch with a turned spindle balustrade and square column supports. A three step stoop leads up to the porch.
