HISTORIC RESOURCE INVENTORY – BUILDINGS AND STRUCTURES

CONTINUATION SHEET

Insert Property Name/Address

Notable Features Continued

A steel H-Beam juts out from the west side of the building connecting to a stone, upright half circle in the parking lot. It is a 300 foot long and fifty feet wide, thin oval shaped building with concrete piers connecting to a concrete platform.

Historical/Architectural Importance Continued

At a Planning and Zoning meeting before the building was approved, Armster responded to criticism about designing modern building in a town with such historic character saying, "When the Pilgrims settled in Guilford in the 17th century, they did not build teepees to be contextual with the architecture of the Indians who inhabited the town. They built wood houses with pitched roofs, suited to their life style and the time." While the spaceship building was initially rejected by many in Guilford, it is now a celebrated local landmark.
